SURVEY BACKGROUND

ABOUT THE NATIONAL CITIZEN SURVEY™

The National Citizen Survey™ (The NCS™) is a collaborative effort between National Research Center, Inc. (NRC) and the International City/County Management Association (ICMA).

The survey and its administration are standardized to assure high quality survey methods and comparable results across The National Citizen Survey™ jurisdictions. Participating households are selected at random and the household member who responds is selected without bias. Multiple mailings give each household more than one chance to participate with self-addressed and postage paid envelopes. Results are statistically weighted to reflect the proper demographic composition of the entire community.

The National Citizen Survey™ customized for this jurisdiction was developed in close cooperation with local jurisdiction staff. Pasco County staff selected items from a menu of questions about services and community problems; they defined the jurisdiction boundaries NRC used for sampling; and they provided the appropriate letterhead and signatures for mailings. Pasco County staff also determined local interest in a variety of add-on options to The National Citizen Survey™ Basic Service.

UNDERSTANDING THE RESULTS

ABOUT CLOSED-ENDED AND OPEN-ENDED QUESTIONS

Questions can either be asked in a closed-ended or open-ended manner. A closed-ended question is one where a set of response options is listed on the survey. Those taking the survey respond to each option listed. Open-ended questions have no answer choices from which respondents select their response. Instead, respondents must “create” their own answers and state them in their own words. The verbatim responses are categorized by topic area using codes. An “other” category is used for responses falling outside the coded categories. In general, a code is assigned when at least 5-10% of responses will fit the code.

Advantages of an open-ended question include:

- Responses are not prompted, allowing respondents to provide answers that are not anticipated or well known.
- This type of question tends to capture response options that come to mind most quickly.
- The final result can be richer, since verbatim responses are included in an appendix, giving you and others a chance to “hear” the voice of respondents in their own words.
- There is a smaller risk of missing important dimensions.

VERBATIMS

Respondents were asked to record their opinions about Pasco County in the following question:

- What do you think are the three biggest issues facing Pasco County over the next several years?

The verbatim responses were categorized by topic area and those topics are reported in the following table with the percent of responses given in each category. Because some comments from residents covered more than a single topic, each topic mentioned by a resident was categorized and counted for the table below. Those verbatim responses are grouped by the first topic listed in each comment whenever a respondent mentioned more than a single topic. Verbatim comments that contain more than one topic nevertheless appear only once (in the category of the first topic listed), however the analysis in the following table counts each of the topic areas given by all respondents regardless where those topics appeared in the comment.

Results from the open-ended question are best understood by reviewing the table of frequencies that summarize responses as well as the actual verbatim responses themselves.

- Unemployment! Crime rate improval, Utilities too high (progress energy) (Bright house)

- Not enough employment (hospital is a plus). Traffic - too many houses. Utilities (Electric especially) is way too expensive!

- Jobs, Controlled residential growth.
- Lack of jobs and the housing market.
- Job growth and retention, completing SR 56 & ridge road, Keeping up w/infrastructure improvements due to growth, transportation needs - partner w/ Hillsboro in new Tampa!

- Need more job opportunities/bus relocate to Pasco. Would like to see a 6 month or yearly program where large, waste items could be picked up from residences. I know a lot of people (my self included) who have a lot of junk (old grills/bikes/lawn mowers/wood) that is stored in their backyards. My hometown in Indiana includes free pick-up every 6 mo. (All you have to do is put it out by the curb on your day).

- Taxes - budget - property value.
- 1.Increasing taxes, 2.Increased crime, 3.Decreased services, 4.Drug use among young people, 5.Decrease property value, 6.Gov funding.

- Too little \$ is being allocated to county animal services. 2 Emails to dept. Of transportation went unanswered about 3yrs ago in reference to putting in a 4-way stop at intersection of Bayette rd. And overpass rd. This intersection still needs a 4-way stop and emails from citizens should always be responded to. I am concerned about a slow rise in home values due to high foreclosure rates.
